

More Than 30 Law Enforcement Agencies Select SunGard Public Sector's OSSI Public Safety Software in 2008

More than 30 police and sheriff's departments in 2008 selected SunGard Public Sector's OSSI Public Safety Suite to provide technology solutions for their police, fire, 911 and public safety employees, including Computer-Aided Dispatch (CAD), Records Management System (RMS), Mobile Computing Technology (MCT), Mobile Field Reporting (MFR), and Police-to-Police Data Sharing (P2P) software.

SunGard Public Sector's new accounts include the following agencies:

- Barry County Sheriff's Department, MI
- Blue Island Police Department, IL
- Douglasville Police Department, GA
- Friendswood Police Department, TX
- Greenburgh Police Department, NY
- Marietta Police Department, GA
- Milton Police Department, GA
- Naperville Police Department, IL
- Oak Lawn ETSB, IL
- Snellville Police Department, GA
- South Elgin Police Department, IL
- Whitfield County Sheriff's Office, GA
- Woodstock Police Department, GA

SunGard Public Sector's Windows®-based OSSI suite will provide these agencies with a fully integrated public safety software solution that will help their departments increase productivity and accountability. Using the Records Management System, investigators can view all related records for open cases, create photo lineups, perform State/NCIC and police-to-police queries, and view CAD event history. While in the field, officers can use Mobile Computing to share information in real time, which will help improve response times and increase officer and citizen safety.
